DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The storage contact hole is confusing since it is not clear what layer encompasses the hole.

Allowable Subject Matter

Claims 1-8 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Claims 9-20 are allowed.

The prior art of record teaches a method of fabricating a liquid crystal display device, comprising: forming a gate line on a substrate using a first mask; depositing a first insulation layer, a semiconductor layer, and a data metal layer on the substrate to cover the gate line; forming a semiconductor layer by simultaneously patterning the first insulation layer, the semiconductor layer, and data metal layer using a second mask; depositing a second insulation layer on the substrate to cover the semiconductor layer; forming a first contact hole through the second insulation layer and the semiconductor layer by patterning the second insulation layer using a third mask; and forming a pixel electrode on the second insulation layer to extend across the gate line using a fourth mask. The prior art of record fails to teach in combination with the limitations supra a width of the first contact hole is larger than a width of the gate line.
